Face Mask Diamond Shape

Smart quality by DTB

Structure:

- Outer layer: Non-woven water repellent fabric prevents fluids from passing through the mask.
- Intermediate layer I: Non-woven fabric with a high level of static filtration, it prevents bacteria, viruses and small particles from passing through it. Its filtration efficiency is $99 \pm 1\%$, tested by the Nelson Laboratory.
- Intermediate layer II: Non-woven fabric with a high level of static filtration, it prevents bacteria, viruses and small particles from passing through it. Its filtration efficiency is $99 \pm 1\%$, tested by the Nelson Laboratory.
- Inner layer: Micro fiber, thermal bonding, non-woven. Soft and comfortable, it absorbs water.

Adjuster:

- Magic Adjuster: When used with the mouth covers the pressure and discomfort in the back of the head is eliminated.
- Best Fit: Adjusts to different head sizes, allowing better placement.
- Fashionable yet simple design: Perfect for long-term use. It can be worn around the neck while not in use, which minimizes contamination and the number of mouth cover changes.
